

In the Name of God

Title of session:  
Introduction of Embase

Speaker: Marzieh kordi

**What is Embase?**

**When we use Embase?**

**How to access Embase?**

**How to search in Embase?**

# What is Embase?

EMBASE is  
published by  
Elsevier Science.

Embbase is a biomedical database that focuses on drugs and pharmacology, medical devices, clinical medicine, and basic science relevant to clinical medicine.

# Approximate Embase Subjects

- Clinical & Internal Medicine
- Pharmacology & Toxicology
- Genetics, Biochemistry, & Molecular Biology
- Surgery & Surgical Specialties
- Neurology & Behavioral Medicine
- Microbiology & Infectious Disease
- Psychiatry & Mental Health
- Oncology
- Healthcare Policy & Management
- Pediatrics
- Biomedical Engineering & Medical Devices

Embase<sup>®</sup>

Contains:

more than 40 million records including articles from more than 8,500 journals published world-wide.

3.6 million conference abstracts from over 11,500 conferences

Reports

When  
we use  
Embase?  
●●●●●●●●

## When we use Embase?

If you need to do a comprehensive search, as for a systematic or scoping review.

If you are searching on drug/pharmacy topics, which are very well supported in Embase

# How to access **Embase?**

Emtree

Emtree, also known as the Elsevier Life Science Thesaurus

Emtree is a retrieval tool

It helps locate articles that may be appropriate for your research

Emtree is the controlled vocabulary used for indexing articles in Embase, it is very similar in concept to the MeSH terms in PubMed and Ovid.

# PICO search options

At the top of the screen you can choose from 4 different search strategy options. The options can also be selected from the drop-down arrow next to each search term:

**/br**

- To find the *maximum* number of results, use the **/br** option. This searches for the term in the Emtree index and its subheadings *plus* it does a free text search of all fields of the database.

**/exp**

- Means it will search for the term in the Emtree index *and* its subheadings

**/de**

- Means for the term in the Emtree index *without* subheadings

**/mj**

- Use **/mj** for one or more of your terms if you are finding too many results and don't need a comprehensive search of the literature. **/mj** limits your search to articles where the indexers have decided that the topic is the *major focus* of the journal article.

# PV Wizard (Pharmacovigilance)

## PV Wizard search

The PV Wizard search form is a query builder in Embase that is meant to help you successfully construct **pharmacovigilance search strategies**.

**What are  
the Filters to  
Focus the  
Search?**

## Sources

- This filter shows you which results are in MEDLINE (also in PubMed via NLM) and which are unique to Embase.

## Drugs:

- This filter lets you limit by drug aspects and options. For instance, with the Naproxen search, the drug filter options include limiting to only studies with **placebo** and **limiting to studies that include a specific comparison intervention** (e.g. ibuprofen or paracetamol).

## Diseases:

- This filter lets you limit the search by a specific disease or condition, which might be the condition your intervention of interest is treating or an adverse affect or outcome.

## Devices

- This filter limits the search to only studies that include a specific medical device

## Floating Subheadings

- This filter narrows a search that includes a subject heading to only search **one or more aspects** of that **subject heading**, such as only Adverse Drug Reactions with Naproxen.

## Age and Gender:

- These filters both let you specify aspects of studies' populations in your search results and limit to, for example, only studies looking at children or women.

## Study Types:

- This filter limits your search results by type of research study methodology.

## Publication Types:

- This filter limits your search by type of publication, such as article or conference paper.

## Authors

- This filter shows the authors with the most publications in your search and lets you filter by one or more of them.

**Conference  
Abstracts:**

- This filter lists the conference names associated with the most publications in your search and lets you filter by one or more of them.

**Drug Trade  
Names & Drug  
Manufacturers:**

- These filters limit your search by a specific drug name or company.

**Device Trade  
Names & Device  
Manufacturers**

- Similarly, these filters limit your search by a specific

**Thanks for your patience**
